## SWM & Waste Recycling Limited

### Environmental Policy

The Management of SWM & Waste Recycling Ltd recognises that it has a responsibility and duty of care to the environment, that its activities have an impact upon the environment in terms of the use of raw materials, emissions to air and water and waste management, and seek to minimise this impact as far as is reasonably practicable. In order to achieve this, the company has set out the following aims:

1. *To identify the significant environmental impacts associated with its recycling and waste management activities, which it can be reasonably expected to control*
2. *Continually improve its environmental performance and employ best available techniques to prevent or minimise pollution arising from its activities*
3. *To meet or exceed where practicable, legislative, regulatory and other requirements relating to its activities*
4. *Implement objectives and targets in support of the company's commitment to continually improve environmental performance, and review them regularly to ensure their achievement*
5. *Develop an Environmental Management System that is accredited to BS EN ISO 14001 standard and provide sufficient resources to ensure it is effectively implemented and maintained*
6. *To minimise where technically and economically feasible, the consumption of energy, water and non renewable resources*
7. *To give adequate consideration to environmental impacts when decisions are taken on the purchasing of raw materials, machinery and consumable items*
8. *Provide interested parties with relevant information on environmental matters arising from the company's activities*
9. *Promote environmental awareness throughout the organisation by providing employees with information, instruction and training, particularly where their work can have an impact upon the environment*
10. *Review this Environmental Policy on a regular basis and publish it to interested parties*
